DETAILED ACTION

1. Applicant's appeal brief filed on January 10, 2011 have been fully considered.

Claims 1-16 are pending in this application.

2. In view of the Appeal Brief filed on January 10, 2011, PROSECUTION IS HEREBY REOPENED. Claims 1-16 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-16 of US patent no. US 6,714,944 B1. Applicant is advised to submit a proper terminal disclaimer which would put the Application in allowable condition.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct

from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-16 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-16 of U.S. Patent No. US 6,714,944 B1 issued to Shapiro et al. Although the conflicting claims are not identical, they are not patentably distinct from each other because all elements of claims 1-16 of the present application correspond to elements of claims 1-16 of the Patent No.: US 6,714,944 B1. The above claims of the present application would have been obvious over claims 1-16 of US 6,714,944 B1 patent because each element of the claims of the present application is anticipated by the claims of the US 6,714,944 B1 patent.

Terminal Disclaimer

4. The terminal disclaimer filed on March 21, 2010 was disapproved by TD approval panel. The person who signed the terminal disclaimer has failed to state his/her capacity to sign for the corporation or other business entity or organization, and he/she has not been established as being authorized to act on behalf of the assignee.
